Burlington, VT | rafa@miguelsolis.com | (210) 846-1806 | www.rafaelasolis.work | linkedin.com/in/rafaelasolis | solunabeeboo.itch.io

## PROFESSIONAL SUMMARY

Game producer pursuing a Project Management minor alongside dual B.S. degrees in Game Design and Game Programming. Has run weekly Agile/Scrum sprints for 5+ game teams and serves as product owner at Pentad Games, building the studio's production toolchain from scratch. Hands-on C++, Lua, and C# experience in Unreal Engine 5 and Unity, including a 2nd-place international finish in the CurseForge Subnautica 2 Modding Contest, makes it possible to plan with every discipline in its own language.

## EDUCATION

### Champlain College

*Bachelor of Science in Game Design; Bachelor of Science in Game Programming*  
*Project Management Minor. GPA: 3.90. Dean's List, all semesters.*

Burlington, VT  
*Expected May 2028*

**Relevant Coursework:** Principles of Project Management, Catalyzing Positive Organizational Behavior, Game Studio I, Games Testing Lab, Applied Ludology, Introduction to the Game Industry, Game Architecture, Principles of Game Design

## EXPERIENCE

### Lead Developer (Product Owner, Lead Designer, Lead Programmer)

October 2024 – Present

*Pentad Games (formerly Vellum Games)*

- Direct a 5–7 person team (up to 10) as product owner on Open Shift, a co-op cozy-horror storekeeping game entering beta, managing the backlog, priorities, and community and teaser launch planning
- Scoped 50+ gameplay features across Open Shift, Scriptorium, and Mega Market Mayhem from concept to implementable work, delivering weekly playable builds under Agile/Scrum
- Built the studio's production suite on self-hosted AFFiNE, replacing an earlier Taiga Discord bot that posted weekly sprint breakdowns: kanban tracking story points, assignees, and completion, with email reminders so tasks stop slipping
- Built an art hub with automated page generation, central asset storage, and critique workflows so feedback stops getting lost in chat
- Added local AI meeting notes and a GitHub integration with nightly builds, so non-programmers can test the latest build without Git

### Project Manager

October 2026 – Present

*Leahy Center for Digital Forensics & Cybersecurity, Champlain College*

*Burlington, VT*

- Restructure documentation, workflows, and meetings across the organization's teams while keeping each team's familiar setup
- Audit existing team processes and introduce improvements with minimal disruption to day-to-day work

### Producer

August 2024 – Present

*Champlain College Academic Game Projects*

- Produced 5+ multidisciplinary teams of 3–6 on weekly sprints, shipping every project on time across one-month to multi-year runs
- Facilitate sprint planning, stand-ups, reviews, and retrospectives; balance workload so each member works to their strengths
- Own roadmaps, bug triage, and QA, turning playtest findings and bug reports into prioritized sprint work
- On The Owl Keeper (educational game), cut full voice-acted dialogue to meet the deadline and redirected the sound designer to voice key story moments, preserving narrative impact
- Author production documentation, schedules, and system diagrams that keep art, design, programming, and audio aligned

### Food Handler (FOH/BOH)

August 2022 – May 2023

*Bakery Lorraine*

*San Antonio, TX*

- Stepped into team lead during peak hours in a high-volume kitchen, coordinating prep and preventing stock shortages

## PROJECTS

### Subnautica 2 Modding Contest, 2nd Place Internationally (CurseForge)

June 2026

- Planned, built, and shipped Easy Third Person (C++, Lua, UE5) on a contest deadline; won 2nd place internationally and \$650
- Released Easy Third Person and The Gold Mod (6,000+ combined downloads); featured on CurseForge's main banner for weeks

### Indie Game Development <https://solunabeeboo.itch.io/>

March 2020 – Present

- Took 12+ original games from concept through release solo, managing scope, schedule, art, and build

## SKILLS

**Production:** Agile/Scrum, Kanban, Waterfall, Sprint Planning, Roadmapping, Backlog Management, Bug Triage, QA Coordination, Scope Management, Risk Mitigation, Production Documentation, Cross-Functional Coordination

**Production Tools:** Jira, Confluence, Taiga, AFFiNE, Google Workspace, Git, GitHub Actions, Subversion

**Languages:** C++, Lua, C#, Python, Java

**Engines:** Unreal Engine 5 (Lyra Framework), UEFN, Unity 6, UE4SS, Blueprints

**Design:** Systems Design, Level Design, Rapid Prototyping, Playtesting and Data Analysis, GDDs, VDDs

**Playtesting:** External playtests for Behaviour Interactive (Dead by Daylight, Blight: Survival)
